EDUCATION

University of Warwick <i>Data Science (MDataSci)</i>	September 2023 - Present
First & Second years: First Class	
Denstone College <i>A-Levels (A*AAA)</i>	September 2021 - June 2023
A-Levels in Maths, Further Maths, Physics and Computer Science.	
Denstone College <i>GCSEs (11A*)</i>	September 2018 - June 2021

EXPERIENCE

WorldQuant

Brain Consultant - Developing and backtesting alpha signals for robust market strategies, evaluating performance through Sharpe and fitness ratios. Passionate about tackling complex problems through research, uncovering insights that drive smarter, data-backed decisions in trading.

Warwick Data Science Society

- **President** - I lead a 15-member executive team, ensuring our events run smoothly and our initiatives have impact. I maintain close ties with partner societies and departments like Statistics and Mathematics, while managing relationships with sponsors such as Jane Street and WorldQuant to support member opportunities and growth.
- **Outreach Head** - I secured partnerships with industry sponsors and helped coordinate speakers and events. I worked with the events team to connect over 80 students with professionals and encourage engagement in the data science community.

Warwick Mixed Hockey Club

- **Training secretary** - Provided fitness and training sessions 3 times a week for over 100 club members, tailoring these to cater for three levels of ability and encouraging members to progress with their individual skills.
- **Fresher Representative** - Elected as one of two Fresher Representatives prior to this role, which allowed me to communicate ideas and opinions effectively with the executive committee.

CERTIFICATIONS

- **WorldQuant – IQC National Finalist**
Competed in WorldQuant's International Quant Championship being one of 8 teams to reach the national final (39th globally out of over 37,000). Collaborating to present my quantitative models to a panel of judges and participating in a Q&A session to scrutinise my ideas.
- **WBSS - Quantitative Investment Group Academy**
Gained an insight into relative valuation approaches using financial ratios, statements, and multiples.

PROJECTS

- **Databases & SQL Coursework (85%)** - Implemented database applications in PostgreSQL via JDBC in Java. Developed and optimised complex SQL queries with views, stored procedures, CTEs, and transactions, ensuring robust handling of real-world use cases such as ticketing, gig scheduling, cancellation workflows and conforming to distinct business rules.
- **brglm2 R Package Enhancement (Ongoing Dissertation Project)** - Developing new estimation algorithms and performance optimisations for the open-source brglm2 R package (~1M annual downloads). Implementing gradient descent methods, sparse QR decompositions, and R-C++ integration to improve computational efficiency for large-scale generalised linear models.

- **Leading Python for Data Science Course (Warwick Data Science Society)** - Currently designing and soon to be teaching a Python for Data Science course. Covering practical applications including data manipulation, exploratory data analysis, and predictive modelling, while developing teaching materials and interactive coding sessions.

SKILLS AND INTERESTS

Technology	Python, SQL Java, C++, C#, R, LaTeX
Interests	Investing, Research, Programming, Field Hockey, F1

EXTRA-CURRICULAR

- Bronze, Silver and Gold (In progress) DofE.
- 7 Years of Voluntary work for local cub-scouts program
